Shrink Wrap for Dairy & Beverage Containers

PE Shrinkable Film

Keep all the pieces intact and bound together with absolutely no space for movement.

The **Shrink Wrap** is made by wrapping the products of any sizes or shapes; it starts with wrapping the products with **plastic film**, then adding heat to it. The **heat** helps the plastic film to shrink and to seal the products tightly.

Businesses use shrink wrapping not just to protect their products but also to improve **products' appeal and transportation**. In addition, shrink wrap packaging **saves storage space** and it is an ideal money-saving solution

- ✓ Shrink film protects from humidity, dust and dirt.
- ✓ Products wrapped in shrink film are temper evident.
- ✓ Shrink film equipment uses less floor space
- ✓ For a given packaging requirement, other forms of packaging use more resources.

Shrink Wrap Machine
used in packaging

Wicketed bags are stacked plastic bags that are held together on a thin metal bar that **makes dispensing faster and easier**. A **bottom gusset** provides extra space for proper arrangement of items that go inside.

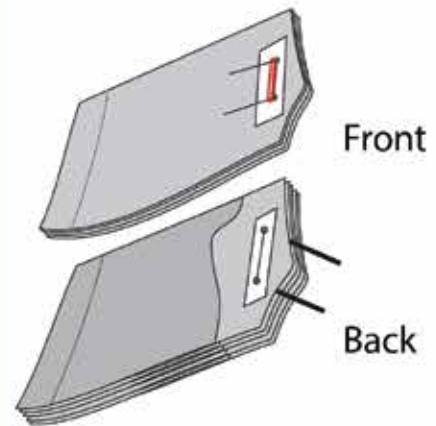

Wicket bags are designed for **automatic packaging machines**. Our durable wicket bags are made from polyethylene and polypropylene. Wicket bags can be made in **various sizes and styles**. Wicket poly bags are commonly used in packaging for **gloves, bakeries, ice** and **vegetables**. Our clear wicketed bags meet US Food and Drug Administration (FDA) and United States Department of Agriculture (USDA) specifications for food contact.

Keeping things Securely Sorted
Wide usage
for other different products too

The **Ziplock Bag** is a re-sealable small bag which is available in many sizes dimension.

You can freeze vegetables and meat for future consumption. This is possible because ziplock bags have a durable seal which prevent entry of oxygen or leaks. Therefore, it enables the contained items to remain fresh for a long time. This makes the ziplock bag reusable.

- ✓ To protect food against frosting
- ✓ Secure top locking
- ✓ Can keep the product clean & damage free
- ✓ Keep out of contamination such as Moisture, Dust and Dirt
- ✓ Protect from sensitive materials and maintain product freshness
